## PROFESSIONAL SUMMARY

Frontend & Mobile Developer with 1 year of experience building and shipping React and Flutter products, with additional UI/UX design experience. Skilled in REST APIs, Firebase, Supabase, Figma, testing, and translating product requirements into responsive, production-ready features. Ranked 1st in Computer Science at Hashemite University.

## EXPERIENCE

**Quark Software | Amman, Jordan** — Oct 2025 - Present

**Frontend & Mobile Developer** — May 2026 - Present

- Build and maintain web and mobile products using React, Angular, Flutter, REST APIs, and reusable components.
- Translate Figma designs and business requirements into responsive features; handle debugging, testing, and delivery across the development lifecycle.

**Flutter Developer & UI/UX Designer** — Feb 2026 - May 2026

- Built Flutter applications using REST APIs, Dio, state management, localization, and reusable components, while designing user flows and prototypes in Figma.
- Worked with clients on requirements, BRDs, testing, issue resolution, and releases.

**Freelance UI/UX Designer** — Jan 2026 - Feb 2026

- Designed development-ready web and mobile interfaces, wireframes, user flows, and interactive prototypes.

**Software Development Intern** — Oct 2025 - Dec 2025

- Supported Flutter development, UI/UX design, and software testing across product tasks.

## SELECTED PROJECTS

**Tamrat - Smart Fasting Companion** | *Flutter, Supabase, UI/UX + React* — 2026

Google Play | Website

- Built and published a multilingual fasting companion with planning, tracking, prayer-time settings, Supabase authentication, and light/dark themes.

**Zaid - Quran Text Assistant** | *Flutter, UI/UX + React* — 2026

Google Play | Website

- Built and published a Quran text assistant with verse search, accessibility-based insertion, favorites, history, RTL support, and formatting controls.

**EcoPals - Graduation Project** | *Flutter, Firebase, Rive, UI/UX + React* — 2025 - 2026

Google Play | Website

- Built an environmental platform with eco challenges, rewards, rankings, notifications, community features, and an interactive virtual pet.

**DeepMindset - Adversarial Robust AI Recognition System** | *Python, CNN, Streamlit* — 2025

GitHub

- Developed an MNIST recognition system achieving 99.08% accuracy and 98.47% adversarial robustness with preprocessing, evaluation, adversarial testing, and an interactive interface.

**Mansaf Rush - 3D Jordanian Game** | *React, Three.js, Blender* — 2026

GitHub | itch.io

- Built a 3D mansaf game inspired by Jordanian culture with Three.js, Blender assets, PC/mobile controls, and Arabic voice lines.

## EDUCATION

**B.Sc. Computer Science - Hashemite University** — 2022 - 2026

**GPA: 3.87/4.00 | Ranked 1st in Class** | Relevant coursework: Data Structures & Algorithms, Database Systems, Machine Learning, Mobile Development.

## CORE SKILLS

**Frontend:** React, JavaScript, HTML, CSS, Responsive Web Development
**Mobile:** Flutter, Dart, Provider, MVVM, Dio, Localization, Android Integration
**Backend & Data:** Firebase, Supabase, REST APIs, SQL
**UI/UX:** Figma, Wireframing, User Flows, Prototyping, Design Systems, Responsive Design
**Programming & Tools:** Java, Python, C++, OOP, Git, Testing, AI-Assisted Development
**Training:** Artificial Intelligence - Samsung Innovation Campus | Flutter & Dart - Academind / Udemy | Python Training - STEAM Center & ZINC | Meta Front-End Developer - Coursera

## AWARDS & LEADERSHIP

First Place - Nahnu Youth Innovation Hackathon, Water Conservation Track (2026) | Top 10 - Zarqa Green Projects Hackathon / IRADA (2024) | Top 5 - Samsung Solve for Tomorrow (2019)

**Leadership:** OSBOHA180 Team Lead | GDSC Core Member/Speaker | Shoman Ambassador | Languages: Arabic Native | English Fluent
